SKILLS

Test Automation · Selenium · Agile Methodologies · TestComplete · JIRA · Risk-Based Testing

EDUCATION

New York University

Bachelor of Science in Computer Science

New York, NY 01/2013 - 01/2016

KEY ACHIEVEMENTS

- **Led Automated Testing Initiative**

  Reduced manual testing efforts by 50% in 2025 through initiative that integrated Selenium with existing testing processes.

- **High Team Efficiency Accredited**

  Under leadership, QA team improved project delivery timelines by 30%, acknowledged by leadership in 2026.

- **Outstanding Bug Resolution Workflow**

  Contributed to the creation of a bug resolution workflow that accelerated issue resolution time by 20% in 2024.

- **Top Speaker of Industry Conference**

  Presented on advanced test automation techniques, receiving positive acclaim from industry experts in 2023.

INTERESTS

Advancing Healthcare Technology

Passionate about using technology to enhance healthcare efficiency and patient outcomes.

SUMMARY

With over 10 years in software quality assurance, leading QA teams in agile environments to achieve exceptional software quality. Expert in test automation using Selenium and proficient in industry-leading QA methodologies. Spearheaded a 25% increase in testing efficiency at previous firms, demonstrating a commitment to delivering top-quality healthcare software solutions.

EXPERIENCE

HealthTech Software, Inc. New York, NY

QA Lead 05/2025 - Present

- Led a team of 10 QA engineers, increasing project delivery speed by 30% through refined testing processes and collaboration.
- Implemented a risk-based testing strategy, reducing critical software defects by 40% and improving overall product quality.
- Established automated regression testing frameworks using Selenium, resulting in a 50% reduction in manual testing time.
- Collaborated with cross-functional teams to integrate continuous testing in CI/CD pipelines, enhancing deployment frequency by 20%.
- Fostered a culture of continuous learning and improvement, organizing monthly training sessions to keep the team updated on industry trends.

SoftMed Solutions Brooklyn, NY

Senior QA Engineer 03/2020 - 04/2025

- Developed comprehensive test plans and strategies that resulted in a 20% improvement in defect detection rates.
- Collaborated with product managers and developers to ensure quality standards adhered to ISO certification, elevating client satisfaction.
- Utilized TestComplete to automate test cases, leading to a 30% increase in testing coverage and effectiveness.
- Mentored junior QA engineers in agile testing methodologies, improving team's adaptability and process adherence significantly.

Innovative Tech Solutions Jersey City, NJ

QA Engineer 06/2016 - 02/2020

- Executed manual and automated testing procedures for multiple software releases, ensuring bug-free launches and client satisfaction.
- Contributed to the development of testing frameworks using Selenium, enhancing test execution speed by 25% in larger projects.
- Identified and documented bugs in JIRA, facilitating an efficient resolution process and improving product quality by 15%.
- Worked closely with UX designers to mitigate usability issues, ensuring a seamless user experience across platforms.
